Declassified and Approved For Release 2012/11/26 : CIA-RDP89-00303R000100060004-0

## Type of Work

The Central Intelligence Agency has openings in its Office of Logistics for experienced and recently graduated engineers who are interested in "facilities engineering." Duties involve the design and supervision of construction, renovation, maintenance and operation of office buildings, laboratories, power distribu-

tion systems, and emergency power generating facilities. Major emphasis is placed on HVAC (heating, ventilating, air conditioning) systems. Engineers represent the Agency in external contacts with construction contractors, equipment suppliers, manufacturers, engineering firms and other Federal Government agencies.

## Salaries and Benefits

Starting salaries range from GSE-07 to GS-12 (\$18,101-\$32,110), commensurate with education and experience.

Transportation and shipment of household effects at Government expense.

Sick Leave-13 days per year.  
Annual Leave-13, 20, or 26 days per year, depending on amount of prior Federal service.

## Qualifications

### Education:

Degree in electrical, mechanical, or civil engineering.

### Experience:

Experience with an electrical, construction, architectural or engineering firm or military or other Government Agency is desirable. Recent college graduates are also encouraged to apply.

### Travel:

Must be available for headquarters, domestic field, and overseas TDY and PCS assignments.

### Citizenship:

U.S. citizenship is required.
